Assembling The Outer Box

1. Lay the outer box flat on the floor and **pre-fold the creases** on edges following the diagram.

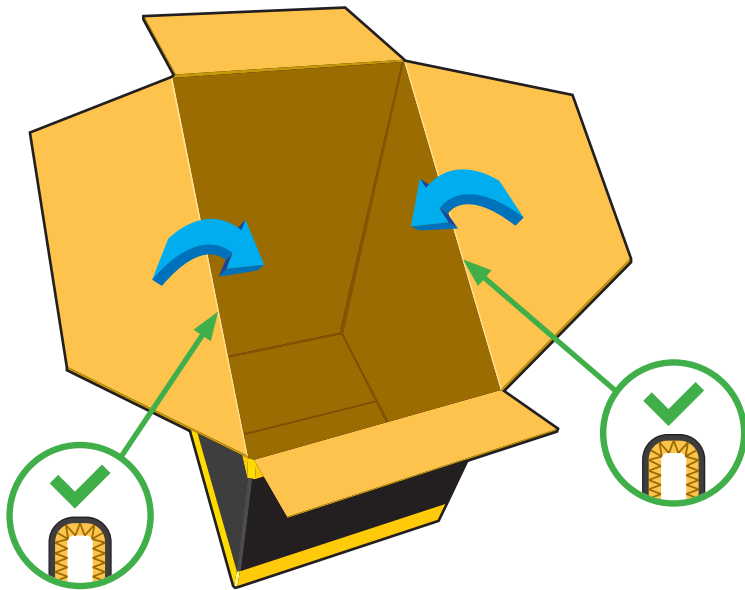

2. Fold the outer box up square and close the base.

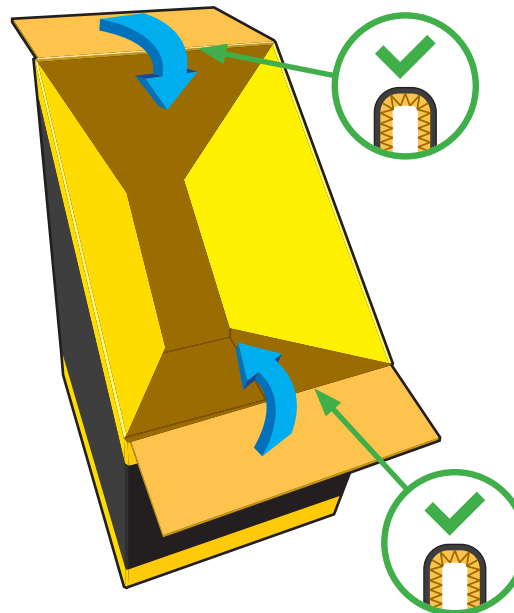

3. Seal the base with tape.

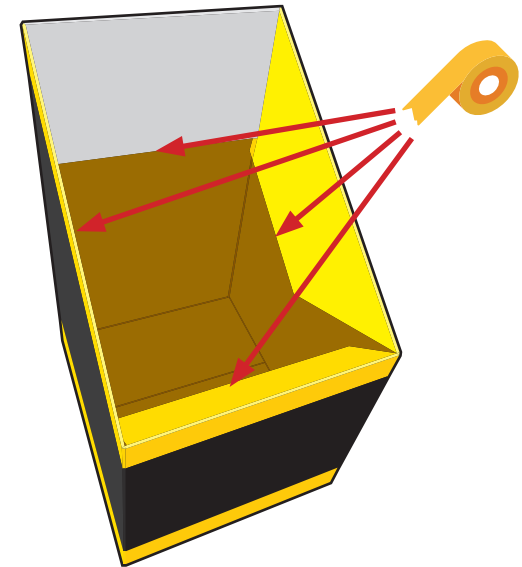

4. Stand the outer box upright and fold the side flaps in.

5. Fold the top and bottom flaps in.

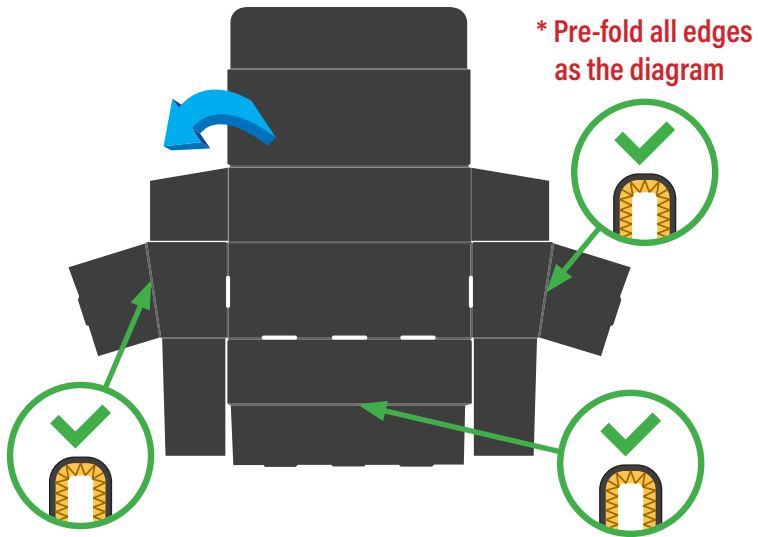

6. Tape the flaps to the walls. The box is ready.

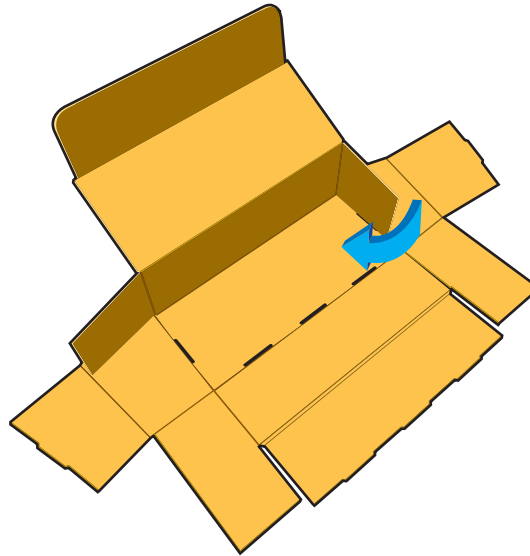

Assembling The Kit Bases

7. Flip the seating base template over.

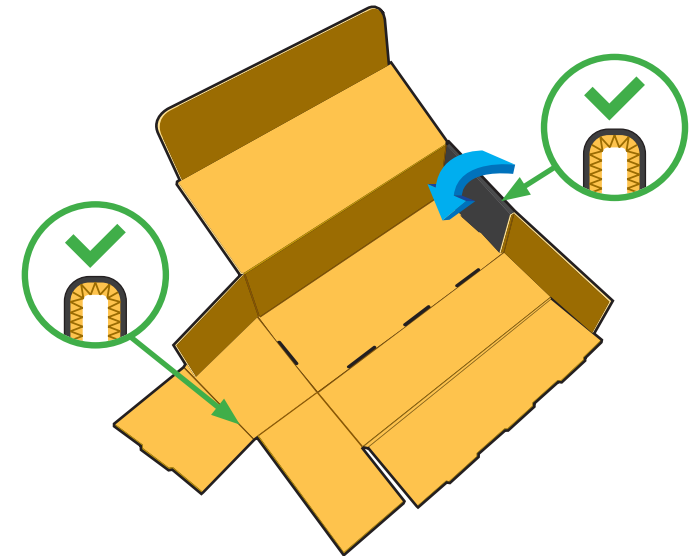

8. Fold in the right inner side wall.

9. Fold in the right outer side wall.

*** Apply this step to the left side.**

10. Fold in the gate folds and the front lip.

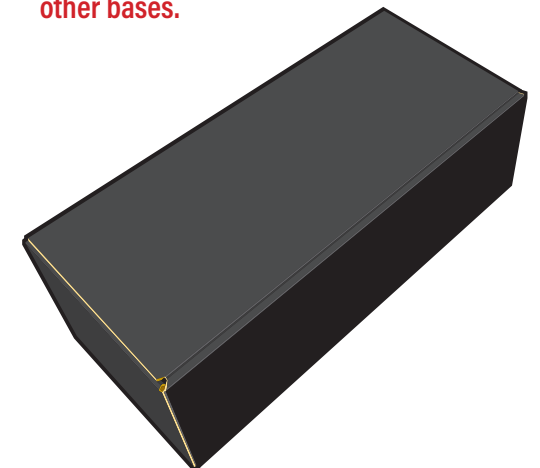

11. Fold down the lid and slide in the tongue.

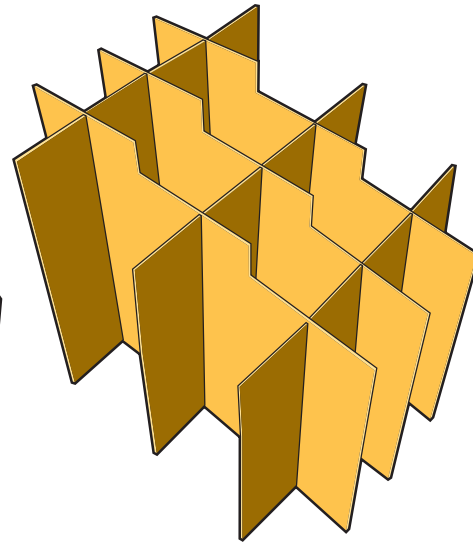

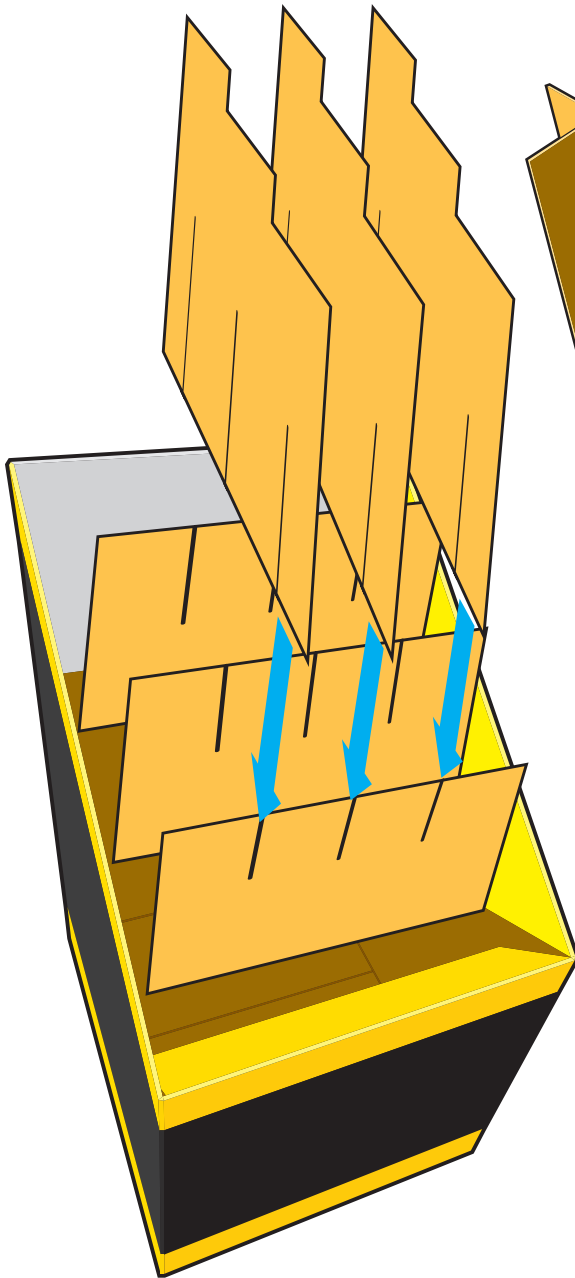

12. The kit seating base is ready.

*** Repeat the whole process on this page for the other bases.**

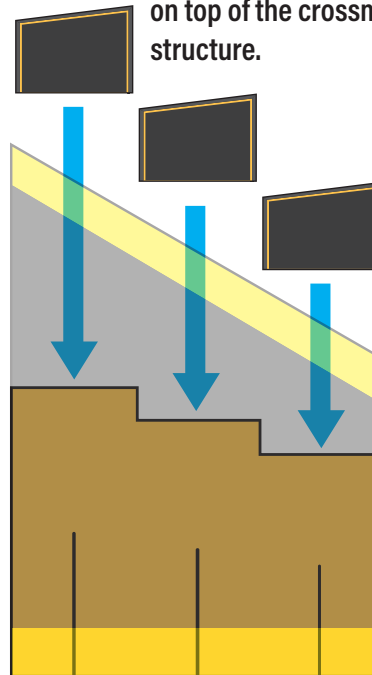

Completing The Assembly

13. Slide the crossmembers into the corresponded slots and place into the outer box.

14. Place the kit seating bases on top of the crossmember structure.

15. The assembly process is completed.
